STAYING HEALTHY

WATER PURIFIER

An absolute essential in developing countries, and important even in many "developed" countries. After much research, we decided on the Pur Scout.

The PUR Scout.

The primary cause of illness overseas is gastrointestinal distress. Usually it's caused by the water. Moreover, countries with safe water supplies can contain unfamiliar bacteria which cause diarrhea. Don't get sick and don't take chances. There are many filters on the market and, after testing, we decided the PUR Scout™ is the best. Compact (9" x 2 1/4") and lightweight (12 ounces) the Scout is not just a water filter like most of its competition, but a water purifier which eliminates even viruses. The EPA has verified the effectiveness of the Scout. It pumps at up to one liter per minute, and its design makes pumping easy. Its replaceable purification cartridge capacity is one of the longest available, approximately 200 gallons. (We recommend at least one extra cartridge for a mission.) Our Scout is the deluxe edition, and includes a StopTop™ which is both a bottle adapter and a carbon filter to remove unpleasant tastes. It also comes with a customized water bottle that attaches to the StopTop. After a mission, it's an essential item in a home emergency kit and on camping trips.

Health tip: Be sure to use purified water when brushing your teeth.

To prevent recontamination, a small residual amount of iodine remains in the purified water. (.05 parts per million.) The average person gets more iodine during normal daily activities. However, all persons, especially those with thyroid problems, should check with physician prior to long-term use.

#1001 The PUR Scout Extra value pack \$75.00

#1002 Replacement cartridge \$40.00

#1003 Carrying Case \$7.00

Staying safe from insects

The Epco Design SleepScreen.

The SleepScreen is essential in any developing country. (And some "developed" ones.) Designed to fit on a bed, using sheets and bedspread. Ultralight and ultrasmall, the SleepScreen is a free-standing net tent that stops even no-see-ums. Fire retardant with fiberglass poles and stuff sack. Again, essential in developing countries. Weighs 10 ozs; 17" x 2.5" in stuff sack.

#1037 SleepScreen \$32.00

Serious Insect Repellent.

Sometimes regular insect repellent isn't enough. We rely on what the United States Army uses. Packaged in 2 oz. squeeze bottles, this repellent contains 71.25 DEET yet is odorless, colorless, and non-oily. E.P.A. authorized. The DEET content of this repellent is extremely high -- which is why it works. (Use sparingly for that reason.) Carry along with normal repellent, for when the bugs get bad.

#1041 Insect Repellent \$3.50

#1042 Three for \$10.00

Environmentally safe bug control.

We recommend carrying some lemon scented citronella candles. They work, and smell good too. Long burning candle, in a flat round container for easy packing. 3.5 oz.
