Information Pretending to be Useful but Actually Propaganda

We are working on a country by country index of television standards worldwide, and would appreciate any help. Increasingly, the need to know a country's television standard is becoming more important as more travelers take their DVDs with them. We have also located a TV Converter that will allow user to change between TV standards, and should have in

stock soon.

Travel Tip

Where is my Hotel?

The first thing to do when you get to your hotel is get their card! This is useful when recommending (or otherwise) to friends but more importantly if you become a little "geographically embarrassed" you can hop in a taxi or some such and be driven home.
